KINJAL HIRAPARA

📍 Christchurch, CAN, NZ | 📞 +64 224154944 | ✉ kinjalhirapara25@gmail.com | in **Linkedin** | 📇 **Portfolio**

PROFILE

- Software Developer with 5+ years of experience building large-scale web applications including dashboards, CMS platforms, and business systems.
- Hands-on experience with React, Angular, TypeScript, and Node.js, with strong expertise in HTML, CSS, Bootstrap.
- Designed and developed scalable, reusable component architectures, with a strong focus on performance optimization, state management, and API integration.
- Proven experience transforming Figma designs and business requirements into cross-device compatible and production-ready user interfaces.
- Uses AI-assisted workflows such as Claude Code and Codex to improve development speed, test coverage, and code quality, with a strong focus on testable, maintainable code.

TECHNICAL SKILL

Programming:	HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Angular, Node.js
UI Libraries & Plugins:	SCSS, Tailwind CSS, Bootstrap, Kendo UI, Fluent UI, ECharts
APIs & Data:	RESTful APIs, Axios
Testing & Debugging:	Jest, React Testing Library, Unit, Integration
Database:	PostgreSQL, SQL
Version Control System:	Git, GitHub, Bitbucket, CI/CD, Webpack, NPM
Methodologies:	SDLS, Agile, Scrum (JIRA), TDD, DevOps - Jenkins CI/CD
AI Tools:	Claude Code, Codex

WORK EXPERIENCE

Web Developer (Volunteer) - Youthline, Christchurch, NZ   November 2025 – Present

- Manage and maintain the Youthline WordPress website by updating content and implementing new features, and customizing themes and plugins to improve user experience and meet functional requirements.
- Collaborate with the team using scrum-based workflow to ensure timely delivery, effective task tracking, and smooth project execution.

Software Developer (Remote) - Predictable Data, USA   June 2025 – Present

Working on a data-quality analytics platform used by analysts and engineers to clean, validate, and transform large datasets.

- Built scalable React component systems using Fluent UI, reducing UI duplication and accelerating feature delivery across the platform.
- Implemented high-performance Syncfusion Data Grid workflows for large datasets (100k+ records), significantly improving data review speed and usability.
- Integrated REST APIs to fetch, update, and visualize large datasets reliably across complex workflows.
- Resolved functional and user interface issues, improving application stability and quality.
- Designed and built custom AI-powered development workflows using Claude Code to automate test generation, code reviews, and content creation, significantly improving development speed and consistency.

Software Developer - Amnex Technologies   March 2021 – Oct 2024

- Developed interactive, responsive dashboard applications using Angular, HTML, SCSS, and visualization libraries such as ECharts and Kendo UI, delivering data-driven user experiences.
- Built reusable Angular components with lazy loading, reactive forms, and state management.
- Integrated RESTful APIs into scalable, data-driven dashboards and data visualizations, ensuring backend connectivity.
- Translated design prototypes and business requirements into smooth, user-friendly applications. Optimized performance and cross-device responsiveness of complex pages.
- Debugged, tested, and refined UI components using Chrome DevTools, and collaborated in Agile teams with designers, developers, and QA to deliver scalable, high-quality solutions.

Front End Developer - Timeloop Technologies   **June 2018 – Feb 2021**

- Delivered responsive CMS platforms, dashboards, and business applications using Angular, HTML, CSS, JavaScript, Bootstrap and jQuery, ensuring cross-browser compatibility and mobile-friendly designs.
- Translated wireframes and design mockups into pixel-perfect, semantic front-end code, improving UI accuracy and ensuring brand consistency across platforms.
- Integrated RESTful APIs using jQuery AJAX with async/await patterns to enable dynamic data rendering, real-time updates.
- Built modular, reusable JavaScript components with optimized DOM manipulation, clean event handling, and a focus on performance, contributing to a scalable and maintainable front-end codebase.
- Collaborated with designers using Figma, gaining practical experience with wireframes, responsive design principles, and managing smooth design-to-development handoff through continuous feedback and visual validation.

PROJECTS

NMDC – Real-Time Mining Dashboard: Angular | Bootstrap | API Integration   **@Amnex Technologies**

- Worked as a Software Developer on a real-time monitoring dashboard for mining operations.
- Built responsive, cross-platform screens using Angular, SCSS, and Bootstrap.
- Integrated Kendo UI and ECharts to create dynamic, real-time data visualizations.
- Consumed RESTful APIs to display live equipment status, energy data, and operational metrics.
- Implemented state management using NgRx, and Angular services to efficiently synchronize data across components.
- Collaborated with designers, backend developers, and QA teams to deliver high-performance, user-centric web solutions.

Circle-Vision – Real Estate CMS Platform : Angular | Bootstrap | jQuery   **@Timeloop Technologies**

- Contributed to the front-end development of a CMS-based platform for real estate agents to create and manage property listing websites.
- Built key features including property listing forms, media upload sections, and theme selection options using Angular and Bootstrap.
- Created 8+ themes using HTML, CSS, and JavaScript to display property data, including images, floor plans, and 3D tour videos, integrated into the CMS via iframes for seamless preview and use.
- Integrated RESTful APIs to enable real-time content updates and seamless data management.
- Collaborated closely with designers and backend developers to deliver a smooth, user-friendly platform.

CF Sales Portal- Sales Insights Platform : HTML | CSS | jQuery | API Integration   **@Timeloop Technologies**

- Developed a bilingual (English and Dutch) web-based sales portal to centralize sales data, forecasting, and management tools.
- Converted design prototypes into fully responsive, user-friendly web pages using HTML, CSS, and JavaScript.
- Integrated REST APIs to fetch and update data across the application.
- Developed an interactive Quiz module for sales team training and knowledge assessments.

EDUCATION

Bachelor of Engineering in Computer Science

School of engineering - R. K. University   Jun 2014 – May 2018

CERTIFICATIONS

[React – The Complete Guide 2025 (incl. Next.js, Redux) from Udemy](#)
